SUMMARY

Computer Science undergraduate with hands-on experience in full-stack development, Python backend development, REST API design, and database-driven applications. Skilled in Python, Flask/ FastAPI, JavaScript, React.js, SQL, and software development practices, with additional experience building AI/ML and LLM-powered applications through internships, projects, and hackathons.

EXPERIENCE

Web Development Trainee

Deftsoft

June 2026 – July 2026

Punjab, India

- Completed professional training in Full-Stack Web Development.
- Developed responsive web applications using React.js and PostgreSQL.
- Built RESTful APIs, implemented backend logic, and integrated databases.
- Worked with Git, authentication, API integration, and modern development workflows.
- Strengthened debugging, problem-solving, and collaborative software development skills.

Project-Based Learning — Python, AI & Machine Learning

ThinkNext Technologies

June 2025 – August 2025

Punjab, India

- Developed backend applications using Python (Flask) with CRUD operations and REST APIs.
- Improved application performance through debugging, testing, and code optimization.
- Built a Music Recommender System using Python and Machine Learning techniques for personalized song recommendations.

Skills

Languages: Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Framer Motion

Backend: FastAPI, Flask, REST APIs

Databases: PostgreSQL, SQLite, Supabase

AI/ML: Machine Learning, Scikit-learn, Pandas, NumPy, Gemini API, AI Agents

Tools: Git, GitHub, VS Code, Jira, Jenkins

Certifications: AWS Academy Cloud Foundations

EDUCATION

B.Tech CSE

Amity University Punjab

Sep 2023 – May 2027

India

PROJECTS

AI Stack Auditor – Multi-Agent AI Spend Rationalization Platform

AI & Full Stack Developer

Jun 2026 – Jul 2026

- Developed a multi-agent AI platform that analyzes company AI software spend, detects duplicate subscriptions, identifies hidden AI add-ons, evaluates ROI, and generates actionable cost optimization reports.
- React.js · FastAPI · Python · Supabase · PostgreSQL · Gemini API · CSS · Framer Motion

AI Co-Builder – Intelligent Project Generation Platform

Full Stack Developer

March 2026 – May 2026

- Built an AI-powered platform that generates software project ideas, architecture, code suggestions, and personalized recommendations with integrated analytics and activity tracking.
- React.js · Flask · Python · PostgreSQL · Gemini API · CSS · REST APIs · Chart.js · Recharts

CodeSage – AI-Powered Security Auditing & Auto-Fix Agent

Full Stack Developer

In Progress

- Building a multi-agent system using LangGraph that clones repositories, runs static analysis, and uses an LLM to triage vulnerability findings by severity.
- Designed the pipeline to auto-generate and verify patches, opening GitHub pull requests for approved fixes; developing FastAPI backend and React frontend.
- React.js · FastAPI · Python · LangGraph · Semgrep · Bandit · Gitleaks

HACKATHONS

- **GUVI AI Hackathon** – Developed an AI-powered software solution using Generative AI and full-stack technologies.
- **Kaggle AI Agents Capstone** – Designed a multi-agent AI application to solve a real-world business optimization challenge.
